G.R. Krause, T.H. Lenagan

Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics) G.R. Krause, T.H. Lenagan

During the two decades that preceded the publication of the first edition of this book, the Gelfand-Kirillov dimension had emerged as a very useful and powerful tool for investigating non-commutative algebras. At that time, the basic ideas and results were scattered throughout various journal articles. The first edition of this book provided a much-needed reliable and coherent single source of information. Since that time, the book has become the standard reference source for researchers. For this edition, the authors incorporated the original text with only minor modifications. Errors have been corrected, items have been rephrased, and more mathematical expressions have been displayed for the purpose of clarity. The newly added Chapter 12 provides broad overviews of the new developments that have surfaced in the last few years, with references to the literature for details. The bibliography has been updated and accordingly, almost double the size of the original one. The faithful revision and contemporary design of this work offers time-honored expertise with modern functionality: A keenly appealing combination. So, whether for the classroom, the well-tended mathematical books collection, or the research desk, this book holds unprecedented relevance.

From reader reviews:

Megan Snyder:

What do you concentrate on book? It is just for students since they're still students or the idea for all people in the world, what best subject for that? Just simply you can be answered for that query above. Every person has diverse personality and hobby per other. Don't to be pushed someone or something that they don't need do that. You must know how great in addition to important the book Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics). All type of book would you see on many sources. You can look for the internet resources or other social media.

Bradley Simpson:

What do you with regards to book? It is not important along? Or just adding material when you need something to explain what the ones you have problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everybody has many questions above. The doctor has to answer that question simply because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need that Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics) to read.

Shannon Thompson:

Reading a guide tends to be new life style in this era globalization. With reading through you can get a lot of information which will give you benefit in your life. Together with book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their reader with their story or even their experience. Not only the storyplot that share in the books. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors in this world always try to improve their ability in writing, they also doing some investigation before they write to the book. One of them is this Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics).

Edward Yung:

That publication can make you to feel relax. This particular book Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics) was bright colored and of course has pictures around. As we know that book Growth of Algebras and Gelfand-Kirillov Dimension (Research notes in mathematics) has many kinds or type. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that.
