Multiple Criteria & Multiple Constraint Levels Linear Programming

Yong Shi

Multiple Criteria & Multiple Constraint Levels Linear Programming Yong Shi
This book introduces multiple criteria and multiple constraint levels linear programming (MC2LP), which is an extension of linear programming (LP) and multiple criteria linear programming (MCLP). In the last decade, the author and a group of researchers from the USA, China, Korea, Germany, and Hungary have been working on the theory and applications of MC2LP problems. This volume integrates their main research results ranging from theoretical bases to broad areas of real world applications. The theoretical bases include the formulation of MC2LP; integer MC2LP and MC2 transportation model; fuzzy MC2LP and fuzzy duality of MC2LP; optimal system designs and contingency plans; MC2 decision support system; and MC2 computer software development. The application areas are accounting, management information systems, production planning, and telecommunications management.The book serves as a seminar text for both undergraduates and graduates who have a linear algebra or equivalent background. For practitioners, it will help in handling LP type problems in multiple decision making environment.

From reader reviews:

Ronald Brun:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite guide and reading a book. Beside you can solve your trouble; you can add your knowledge by the publication entitled Multiple Criteria & Multiple Constraint Levels Linear Programming. Try to make the book Multiple Criteria & Multiple Constraint Levels Linear Programming as your buddy. It means that it can to be your friend when you experience alone and beside that course make you smarter than previously. Yeah, it is very fortuned for yourself. The book makes you a lot more confidence because you can know everything by the book. So , we should make new experience and knowledge with this book.

Mark Hart:

Reading a guide tends to be new life style in this particular era globalization. With looking at you can get a lot of information that will give you benefit in your life. With book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their reader with their story or their experience. Not only the storyline that share in the publications. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on earth always try to improve their ability in writing, they also doing some research before they write to the book. One of them is this Multiple Criteria & Multiple Constraint Levels Linear Programming.

Angel Sherrill:

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't assess book by its deal with may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be Multiple Criteria & Multiple Constraint Levels Linear Programming why because the amazing cover that make you consider with regards to the content will not disappoint you. The inside or content is usually fantastic as the outside or cover. Your reading sixth sense will directly make suggestions to pick up this book.

Kyle Smallwood:

That guide can make you to feel relax. This specific book Multiple Criteria & Multiple Constraint Levels Linear Programming was colourful and of course has pictures on there. As we know that book Multiple Criteria & Multiple Constraint Levels Linear Programming has many kinds or genre. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading this.
