Receptors: Models for Binding, Trafficking, and Signaling

Douglas A. Lauffenburger, Jennifer Linderman

Receptors: Models for Binding, Trafficking, and Signaling Douglas A. Lauffenburger, Jennifer Linderman

Receptors: Models for Binding, Trafficking, and Signaling bridges the gap between chemical engineering and cell biology by lucidly and practically demonstrating how a mathematical modeling approach combined with quantitative experiments can provide enhanced understanding of cell phenomena involving receptor/ligand interactions. In stressing the need for a quantitative understanding of how receptor-mediated cell functions depend on receptor and ligand properties, the book offers comprehensive treatments of both basic and state-of-the-art model frameworks that span the entire spectrum of receptor processes--from fundamental cell surface binding, intracellular trafficking, and signal transduction events to the cell behavioral functions they govern, including proliferation, adhesion, and migration. The book emphasizes mechanistic models that are accessible to experimental testing and includes detailed examples of important contemporary issues. This much-needed book introduces chemical engineers and bioengineers to important problems in receptor biology and familiarizes cell biologists with the insights that can be gained from engineering analysis and synthesis. As such, chemical engineers, researchers, and advanced students in the fields of biotechnology, biomedical sciences, bioengineering, and molecular cell biology will find this book to be conceptually rich, timely, and useful.

From reader reviews:

Ann Davis:

Are you kind of occupied person, only have 10 as well as 15 minute in your time to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are having problem with the book than can satisfy your short space of time to read it because pretty much everything time you only find guide that need more time to be read. Receptors: Models for Binding, Trafficking, and Signaling can be your answer since it can be read by anyone who have those short time problems.

Alice Smith:

In this age globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Often the book that recommended to you is Receptors: Models for Binding, Trafficking, and Signaling this reserve consist a lot of the information with the condition of this world now. This kind of book was represented so why is the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Often the writer made some investigation when he makes this book. Honestly, that is why this book suited all of you.

Jacqueline Stalling:

This Receptors: Models for Binding, Trafficking, and Signaling is brand-new way for you who has interest to look for some information since it relief your hunger of information. Getting deeper you into it getting knowledge more you know or you who still having little digest in reading this Receptors: Models for Binding, Trafficking, and Signaling can be the light food for yourself because the information inside this book is easy to get by means of anyone. These books build itself in the form and that is reachable by anyone, yes I mean in the e-book web form. People who think that in e-book form make them feel drowsy even dizzy this book is the answer. So you cannot find any in reading a publication especially this one. You can find actually looking for. It should be here for an individual. So , don't miss it! Just read this e-book variety for your better life along with knowledge.

Jack Harbin:

As we know that book is significant thing to add our information for everything. By a e-book we can know everything we want. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This book Receptors: Models for Binding, Trafficking, and Signaling was filled about science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading a new book. If you know how big benefit from a book, you can feel enjoy to read a publication. In the modern era like at this point, many ways to get book that you simply wanted.
