Interactive Qualitative Analysis: A Systems Method for Qualitative Research Norvell Northcutt, Danny McCoy

Interactive Qualitative Analysis: A Systems Method for Qualitative Research aims to help students unscramble the mysteries of qualitative data collection, coding, and analysis by showing how to use a systematic, qualitative technique: interactive qualitative analysis. The authors synthesize ideas from grounded theory, path and factor analysis, quality management theory, Foucauldian concepts of power and knowledge, and systems theory. A dialectical revision of Guba and Lincoln's theory of rigor is offered which, combined with systems theory, offers new insights into the meaning of reliability and validity in qualitative research.
