Nonlinear Optical Crystals contains the most complete and up-to-date reference material on properties of nonlinear optical crystals including:

Traditional and specific applications

The mathematical formulas necessary for the calculation of the frequency conversion process

A survey of 63 nonlinear optical crystals containing more than 1500 different references with full titles

Recent applications of common and novel nonlinear materials, including quasi-phase matching

Special consideration for periodically-poled and self-frequency-doubling materials

Significant amount of crystallophysical, thermophysical, spectroscopic, electro-optic and magneto-optic information
