Near Death in the ICU Laurin Bellg MD

A phenomenal collection of medical patient accounts of encounters with the mysterious during severe illness and life-threatening injury from the voice of the physician who took care of them. Both touching and thought-provoking, this book invites you to reconsider what happens when we die, and in doing so, challenges you to ponder that perhaps we are much more than our earth-bound physical bodies.

Near-death experiences are often profoundly meaningful, yet when they are reported, they are frequently met with skepticism and dismissal by medical caregivers and family members. But do we have to fully understand these events to honor the transformative role they often play in the lives of those who experience them?

For nearly twenty years, Dr. Laurin Bellg has been present at the bedside of critically ill and dying patients. As she has worked to create an accepting and supportive relationship with them, her patients have shared with her the mysterious experiences they sometimes have during moments of crisis of apparently seeing beyond our physical world. In telling their engaging, powerful and sometimes humorous stories, Dr. Bellg invites the reader to consider that bearing witness to a patient's near-death experience is a respectful and meaningful part of medical care, a way for families to support their loved ones, and an important part of the patient's healing. Do we need to prove they are something more than the result of illness, medication or a dying brain to acknowledge their power to impact lives in a positive way?
