Bispectral Methods of Signal Processing

Alexander V. Totsky, Alexander A. Zelensky, Victor F. Kravchenko

Bispectral Methods of Signal Processing Alexander V. Totsky, Alexander A. Zelensky, Victor F. Kravchenko

By studying applications in radar, telecommunications and digital image restoration, this monograph discusses signal processing techniques based on bispectral methods. Improved robustness against different forms of noise as well as preservation of phase information render this method a valuable alternative to common power-spectrum analysis used in radar object recognition, digital wireless communications, and jitter removal in images.
