# Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence)

## Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence)

This book highlights several gaps that have not been addressed in existing cyber security research. It first discusses the recent attack prediction techniques that utilize one or more aspects of information to create attack prediction models. The second part is dedicated to new trends on information fusion and their applicability to cyber security; in particular, graph data analytics for cyber security, unwanted traffic detection and control based on trust management software defined networks, security in wireless sensor networks & their applications, and emerging trends in security system design using the concept of social behavioral biometric. The book guides the design of new commercialized tools that can be introduced to improve the accuracy of existing attack prediction models. Furthermore, the book advances the use of Knowledge-based Intrusion Detection Systems (IDS) to complement existing IDS technologies. It is aimed towards cyber security researchers.

### **From reader reviews:**

#### **Daria Gertz:**

The book Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) can give more knowledge and information about everything you want. Why then must we leave the good thing like a book Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence)? A few of you have a different opinion about e-book. But one aim which book can give many data for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or data that you take for that, you may give for each other; it is possible to share all of these. Book Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) has simple shape but you know: it has great and large function for you. You can seem the enormous world by open and read a guide. So it is very wonderful.

#### **Joseph Gee:**

The knowledge that you get from Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) may be the more deep you digging the information that hide within the words the more you get interested in reading it. It does not mean that this book is hard to be aware of but Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) giving you joy feeling of reading. The author conveys their point in specific way that can be understood by simply anyone who read that because the author of this e-book is well-known enough. This book also makes your current vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) instantly.

#### **Tara Smith:**

This Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) tend to be reliable for you who want to certainly be a successful person, why. The reason of this Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) can be one of several great books you must have is usually giving you more than just simple studying food but feed an individual with information that perhaps will shock your preceding knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions at e-book and printed types. Beside that this Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) forcing you to have an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day action. So , let's have it and revel in reading.

#### **Lorna Dews:**

Your reading sixth sense will not betray a person, why because this Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) reserve written by well-known writer whose to say well how to make book that may be understand by anyone who all read the book. Written inside good manner for

you, still dripping wet every ideas and composing skill only for eliminate your own hunger then you still uncertainty Information Fusion for Cyber-Security Analytics (Studies in Computational Intelligence) as good book but not only by the cover but also through the content. This is one publication that can break don't ascertain book by its deal with, so do you still needing a different sixth sense to pick this specific!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.
