Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) Nasrin Nasrollahi

This thesis transforms satellite precipitation estimation through the integration of a multi-sensor, multi-channel approach to current precipitation estimation algorithms, and provides more accurate readings of precipitation data from space.

Using satellite data to estimate precipitation from space overcomes the limitation of ground-based observations in terms of availability over remote areas and oceans as well as spatial coverage. However, the accuracy of satellite-based estimates still need to be improved.

The approach introduced in this thesis takes advantage of the recent NASA satellites in observing clouds and precipitation. In addition, machine-learning techniques are also employed to make the best use of remotely-sensed "big data." The results provide a significant improvement in detecting non-precipitating areas and reducing false identification of precipitation.

From reader reviews:

Isaiah Owen:

Information is provisions for folks to get better life, information nowadays can get by anyone in everywhere. The information can be a knowledge or any news even an issue. What people must be consider when those information which is from the former life are challenging be find than now's taking seriously which one is suitable to believe or which one typically the resource are convinced. If you receive the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) as the daily resource information.

Jose Williams:

Why? Because this Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) is an unordinary book that the inside of the publication waiting for you to snap this but latter it will jolt you with the secret it inside. Reading this book beside it was fantastic author who also write the book in such wonderful way makes the content on the inside easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of gains than the other book include such as help improving your proficiency and your critical thinking approach. So , still want to hold up having that book? If I have been you I will go to the guide store hurriedly.

Irene Carpenter:

Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) can be one of your basic books that are good idea. All of us recommend that straight away because this book has good vocabulary that will increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort to place every word into pleasure arrangement in writing Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) nevertheless doesn't forget the main stage, giving the reader the hottest along with based confirm resource details that maybe you can be certainly one of it. This great information can easily drawn you into brand new stage of crucial imagining.

Donald Vermillion:

Your reading 6th sense will not betray a person, why because this Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) e-book written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your personal hunger then you still hesitation Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) as good book not simply by the cover but also through

the content. This is one publication that can break don't judge book by its include, so do you still needing an additional sixth sense to pick this specific!? Oh come on your examining sixth sense already alerted you so why you have to listening to another sixth sense.

Read Improving Infrared-Based Precipitation Retrieval Algorithms Using Multi-Spectral Satellite Imagery (Springer Theses) by Nasrin Nasrollahi for online ebook
