Plant Biology for Cultural Heritage: Biodeterioration and Conservation

Plant Biology for Cultural Heritage: Biodeterioration and Conservation

This book brings together wide-ranging scientific contributions from the field of plant biology relating to the biodeterioration and conservation of art, architecture, and archaeological sites around the world.

Plant Biology for Cultural Heritage presents the work of dozens of scientists who have studied problems presented by the biological degradation of cultural heritage, tackling both general topics (mechanisms of biodeterioration; correlation between biodeterioration and environment; and destructive organisms) and specific ones (problems presented by different materials; various environmental and climatic conditions; and diverse geographic settings). The book also discusses solutions for the prevention and control of deterioration, including appropriate diagnostic techniques.
