**Hard science fiction's grand master delivers the stunning conclusion to his Orthogonal trilogy.**

In a universe where the laws of physics and the speed of light are completely alien to our own, the travelers on the ship *Peerless* have completed a generations-long struggle to develop advanced technology in a desperate attempt to save their home world. But as tensions mount over the risks of turning the ship around and starting the long voyage home, a new complication arises: the prospect of constructing a messaging system that will give the *Peerless* news of its own future.

While some see this as a guarantee of safety and a chance to learn of their mission's ultimate success, others are convinced that the knowledge will be oppressive or worse—that the system could be abused. The conflict over this proposed communication system tears the travelers' society apart, culminating in terrible violence. To save the *Peerless* and its mission, two rivals must travel to a world where time runs in reverse.

Continuing in the tradition of *The Clockwork Rocket* and *The Eternal Flame*, Greg Egan's Orthogonal trilogy has continuously pushed the boundaries of scientific fiction, without ever losing track of the lives of the individuals carrying out this grand mission. *The Arrows of Time* brings this fascinating space opera to a close while offering insight into human nature and the struggles we face, both as individuals and as a species.

Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a *New York Times* bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.
