DNA and Genetic Engineering (Cells & Life) Robert Sneddon

The living world is all about cells - it is cells. Cells working alone and cells working together. All life is cells! A cell is too small for us to see without a microscope, yet this tiny chemical package holds all the ingredients of life. Some living things are just a single cell, but did you know that there are around 65 million million cells in your body? Cells are life's building blocks. All the living things you see around you are made up of millions and millions of cells - all working together. Cells and Life is a series of books that explore all aspects of cells and the living world, and include snippets of science history, as well as current key scientific achievements. The books include: - stunning photos, artwork and diagrams - further reading and websites - extensive glossary and index
