Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN Lawrence Harte, David Bowler, Avi Ofrane, Ben Levitan

This book provides a big picture of the key wireless industries, what systems and technologies they use, how they operate, their market trends, and what services they provide. If you are involved or you are getting involved in the wireless industry, your life is changing. The growth and decline of wireless industries can be well over 40% per year and it rapidly changes. Some wireless systems that were "hot technologies" just 10 years ago with billions of dollars in investment with national or global presence are simply gone. This information covered in this book ranges from the basics to what's new in wireless. You will learn that each wireless industry has its own unique advantages and limitations, which offer important economic and technical choices for managers, salespeople, technicians, and others involved with wireless telephones and systems. This book provides the background for a good understanding of the major wireless technologies, issues, and options available. The book starts with a basic introduction to wireless communication. It covers the different types of industries, who controls and regulates them, and provides a basic definition of each of the major wireless technologies. A broad overview of the telecom voice, data, and multimedia applications is provided. You will discover the fundamentals of wireless technologies and their terminology are described along with how the radio frequency spectrum is divided, the basics of radio frequency transmission and modulation, antennas and radio networks. The different types of analog and digital mobile telephone systems and their evolution are covered. Included is the basic operation, attributes and services for analog cellular (1st generation), digital cellular (2nd generation), packet based cellular (2 ½ generation), and wideband cellular (3rd generation) communication systems. Private land mobile radio (PLMR) dispatch and two-way radio systems are explained along with how they are changing from proprietary analog systems to advanced digital multimedia communication systems. The basics of mobile data are provided along with the available types of packet and circuit switched data systems and how they operate. Descriptions of paging systems are provided and you will discover how paging systems are evolving from one-way numeric messaging to two-way interactive information services. Important characteristics of satellite systems are covered. An overview of fixed wireless systems including point to point microwave, wireless cable, and broadband wireless is included. The fundamentals of radio and television broadcast systems are covered along with how they are converting from analog to digital systems and why in just a few years service to existing radios and telephones will stop. The fundamentals of residential cordless, public cordless and WPBX telephone systems covered. Wireless local area networks (WLANs) basics are provided including the different versions of 802.11. Short-range Bluetooth wireless is explained along with how it is used by accessories such as headsets, keyboards, cameras, and printers. The fundamentals of billing and customer care systems are provided along with these systems collect and process service and usage charges.

From reader reviews:

Hector Naranjo:

Reading a publication tends to be new life style within this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Lots of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their skill in writing, they also doing some investigation before they write to their book. One of them is this Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN.

William Perrotta:

Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN can be one of your nice books that are good idea. We all recommend that straight away because this book has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to put every word into delight arrangement in writing Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN but doesn't forget the main place, giving the reader the hottest as well as based confirm resource facts that maybe you can be one of it. This great information can certainly drawn you into brand-new stage of crucial imagining.

Sandra Jordon:

As we know that book is vital thing to add our knowledge for everything. By a book we can know everything we wish. A book is a group of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This publication Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN was filled about science. Spend your free time to add your knowledge about your technology competence. Some people has distinct feel when they reading a book. If you know how big benefit from a book, you can experience enjoy to read a guide. In the modern era like today, many ways to get book that you simply wanted.

Nicholas Schindler:

That e-book can make you to feel relax. That book Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN was colourful and of course has pictures around. As we know that book Wireless Systems, Cellular, 3G, LMR, Mobile Data, Paging, Satellite, Broadcast, and WLAN has many kinds or variety. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading

this.
