Night Wraps the Sky: Writings by and about Mayakovsky Vladimir Mayakovsky

From the time his first, futurist poems were published in 1912 until his suicide at the age of thirty-six, Vladimir Mayakovsky made theatrical appearances in his written work and perfected an iconoclastic voice James Schuyler called "the intimate yell." As the poet laureate of the Russian Revolution, Mayakovsky led a generation that staked everything on the notion that an artist could fuse a public and a private self. But by the time of Stalin's terror, the contradictions of the revolution caught up with him, and he ended in despair.

A major influence on American poets of the twentieth century, Mayakovsky's work remains fascinating and urgent. Very few English translations have come close to capturing his lyric intensity, and a comprehensive volume of his writings has not been published in the past thirty years. In *Night Wraps the Sky*, the acclaimed filmmaker Michael Almereyda (*Hamlet*, *William Eggleston in the Real World*) presents Mayakovsky's key poems?translated by a new generation of Russian-American poets?alongside memoirs, artistic appreciations, and eyewitness accounts, written and pictorial, to create a full-length portrait of the man and the mythic era he came to embody.
