**Written by leading diving authorities, Abbeville's *Dive Guides* combine the best in underwater photography with the most complete, three dimensional diagrams and practical information on the worlds most popular dive spots.**

A sweeping cluster of archipelagoes tossed into the Pacific like a handful of pears, French Polynesia is the dream of millions of tourists and thousands of divers: the clearness of its waters, the richness of its sea beds, and the diversity of its sea flora and fauna make the 115 islands—amazing coral or volcanic atolls—an underwater paradise.

Full-color, three-dimensional maps of each dive site offer what no book has ever before provided: the information needed to plan your dive down to the last detail. You can review the exact layout of the site—including depths, sizes, and distances between reefs and wrecks or any hazards—and even the lighting conditions for optimum underwater photography. The short chapters covering the 27 dives in this book provide crucial data bout depths, currents, water variables, and plant and animal life, and each book ends with a full-color visual encyclopedia of the most common fish that inhabit the area.
