Modern Radar System Analysis Software and User's Manual, Version 3.0 David K. Barton

This powerful, updated software offers radar and electronic warfare engineers a highly accurate and efficient tool for solving the radar equation for the maximum range at which a radar can achieve target detection under conditions of various interference sources, such as thermal noise, surface clutter, precipitation, chaff, and jamming. An invaluable, time-saving resource for professionals in the field, the new version of this popular software boasts superior graphics capabilities, making every step of the calculation process visible to the user. Version 3.0 also improves upon past versions by allowing users to make modifications to accommodate special requirements not anticipated by the software creator.
