Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series)

Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series)

When this book was first published in 1996, the pollution of the earth's freshwater habitats was, as it is now, a topic of major concern. This synthesis considers the effects of pollutants on aquatic animals via a series of research and review articles that present experimental evidence of sublethal and lethal effects of a range of toxicants at the physiological, cellular and subcellular levels, and that explore techniques for detection of pollution damage. Topics covered include routes of uptake of toxicants; the effect of acute and chronic exposure to toxic metal ions, particularly zinc, copper and aluminium, with emphasis on the mechanisms of toxicity and responses to chronic exposure to sublethal levels; the impact on fish biology of two chemicals of current concern, nitrites and polyaromatic hydrocarbons, which may act as oestrogenic substances or potent mutagens; and in vitro studies of the mechanisms of toxicity at the cellular and subcellular level, including damage of DNA, using cultured fish cells.

From reader reviews:

Dennis Thorpe:

Have you spare time for the day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a move, shopping, or went to the Mall. How about open or perhaps read a book allowed Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series)? Maybe it is to become best activity for you. You realize beside you can spend your time using your favorite's book, you can better than before. Do you agree with it is opinion or you have different opinion?

Jean Smith:

The book Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series) gives you the sense of being enjoy for your spare time. You need to use to make your capable more increase. Book can to be your best friend when you getting stress or having big problem along with your subject. If you can make studying a book Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series) to get your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You could know everything if you like start and read a reserve Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series). Kinds of book are several. It means that, science guide or encyclopedia or other individuals. So , how do you think about this book?

June Weiss:

The actual book Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series) has a lot details on it. So when you check out this book you can get a lot of gain. The book was compiled by the very famous author. The author makes some research just before write this book. That book very easy to read you will get the point easily after scanning this book.

Heather Killen:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading through is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Toxicology of Aquatic Pollution: Physiological, Molecular and Cellular Approaches (Society for Experimental Biology Seminar Series) can make you experience more

interested to read.
