Designed as a text for students and professionals pursuing careers in the fields of molecular biology, pharmacy and bioinformatics, the fourth edition continues to offer a fascinating and authoritative treatment of the entire spectrum of bioinformatics, covering a wide range of high-throughput technologies. In this edition, four new chapters are included and two chapters are updated.

As a student-friendly text, it embodies several pedagogic features such as detailed examples, chapter-end problems, numerous tables, a large number of diagrams, flow charts, a comprehensive glossary and an up-to-date bibliography. This book should prove an invaluable asset to students and researchers in the fields of bioinformatics, biotechnology, computer-aided drug design, information technology, medical diagnostics, molecular biology and pharmaceutical industry.

NEW TO THE FOURTH EDITION:

- Includes four new chapters--Introduction to Biological Databases, Introduction to Phylogenetic, Methods of Phylogenetic analysis and RNA Predict.
- Updates chapters on Information Search and Data Retrieval and Alignment of Multiple Sequences.
- Incorporates Problem Sets containing more than 250 problems and Multiple Choice Questions so that students can test their knowledge and understanding.

Key Features

- State-of-the-art technologies for gene identification, molecular modelling and monitoring of cellular processes
- Data mining, analysis, classification, interpretation and efficient structure determination of genomes and proteomes
- Importance of cell cycle for discovering new drug targets and their ligands
- Computer-aided drug design and ADME-Tox property prediction

From reader reviews:

Jonathan Scott:

What do you with regards to book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to complete others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They must answer that question since just their can do this. It said that about guide. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this specific Bioinformatics: Methods and Applications: Genomics, Proteomics and Drug Discovery to read.

Carla Arbogast:

Do you one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Bioinformatics: Methods and Applications: Genomics, Proteomics and Drug Discovery book is readable by means of you who hate those perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer regarding Bioinformatics: Methods and Applications: Genomics, Proteomics and Drug Discovery content conveys thinking easily to understand by most people. The printed and e-book are not different in the written content but it just different available as it. So , do you nevertheless thinking Bioinformatics: Methods and Applications: Genomics, Proteomics and Drug Discovery is not loveable to be your top record reading book?

Juan Turgeon:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them family members or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity here is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day long to reading a guide. The book Bioinformatics: Methods and Applications: Genomics, Proteomics and Drug Discovery it is quite good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. When you did not have enough space to bring this book you can buy the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not too costly but this book features high quality.

Ian Sharpless:

Playing with family in a very park, coming to see the water world or hanging out with good friends is thing that usually you could have done when you have spare time, and then why you don't try issue that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Bioinformatics: Methods

and Applications: Genomics, Proteomics and Drug Discovery, you are able to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't understand it, oh come on its named reading friends.
