Lasers (Wiley Series in Pure and Applied Optics)

Peter W. Milonni, Joseph H. Eberly

Lasers (Wiley Series in Pure and Applied Optics) Peter W. Milonni, Joseph H. Eberly

Lasers A comprehensive introduction to the operating principles and applications of lasers. Explains basic principles, including the necessary elements of classical and quantum physics. Provides concise discussions of various laser types including gas, solid state, semiconductor, and free electron lasers, as well as of laser resonators, diffraction, optical coherence, and many applications including holography, phase conjugation, wave mixing, and nonlinear optics. Incorporates many intuitive explanations and practical examples. Discussions are self-contained in a consistent notation and in a style that should appeal to physicists, chemists, optical scientists and engineers.

An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

From reader reviews:

Eric Campanelli:

Have you spare time for the day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a wander, shopping, or went to often the Mall. How about open or perhaps read a book allowed Lasers (Wiley Series in Pure and Applied Optics)? Maybe it is to get best activity for you. You already know beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have some other opinion?

Earl Martinez:

Book is usually written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important thing to bring us around the world. Beside that you can your reading proficiency was fluently. A guide Lasers (Wiley Series in Pure and Applied Optics) will make you to become smarter. You can feel much more confidence if you can know about anything. But some of you think that will open or reading any book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you seeking best book or ideal book with you?

Mary Lewis:

The book untitled Lasers (Wiley Series in Pure and Applied Optics) is the e-book that recommended to you to see. You can see the quality of the book content that will be shown to you actually. The language that article author use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, and so the information that they share for you is absolutely accurate. You also might get the e-book of Lasers (Wiley Series in Pure and Applied Optics) from the publisher to make you much more enjoy free time.

Wanda Holmes:

Are you kind of hectic person, only have 10 or 15 minute in your day time to upgrading your mind ability or thinking skill also analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your limited time to read it because this all time you only find reserve that need more time to be learn. Lasers (Wiley Series in Pure and Applied Optics) can be your answer given it can be read by you who have those short extra time problems.
