## **New Directions in Conservation Medicine: Applied Cases of Ecological Health**

In recent years, species and ecosystems have been threatened by many anthropogenic factors manifested in local and global declines of populations and species. Although we consider conservation medicine an emerging field, the concept is the result of the long evolution of transdisciplinary thinking within the health and ecological sciences and the better understanding of the complexity within these various fields of knowledge. Conservation medicine was born from the cross fertilization of ideas generated by this new transdisciplinary design. It examines the links among changes in climate, habitat quality, and land use; emergence and re-emergence of infectious agents, parasites and environmental contaminants; and maintenance of biodiversity and ecosystem functions as they sustain the health of plant and animal communities including humans.

During the past ten years, new tools and institutional initiatives for assessing and monitoring ecological health concerns have emerged: landscape epidemiology, disease ecological modeling and web-based analytics. New types of integrated ecological health assessment are being deployed; these efforts incorporate environmental indicator studies with specific biomedical diagnostic tools. Other innovations include the development of non-invasive physiological and behavioral monitoring techniques; the adaptation of modern molecular biological and biomedical techniques; the design of population level disease monitoring strategies; the creation of ecosystem-based health and sentinel species surveillance approaches; and the adaptation of health monitoring systems for appropriate developing country situations. *New Directions of Conservation Medicine: Applied Cases of Ecological Health* addresses these issues with relevant case studies and detailed applied examples. *New Directions of Conservation Medicine* challenges the notion that human health is an isolated concern removed from the bounds of ecology and species interactions. Human health, animal health, and ecosystem health are moving closer together and at some point, it will be inconceivable that there was ever a clear division.

### **From reader reviews:**

#### **Agnes Higa:**

This book untitled New Directions in Conservation Medicine: Applied Cases of Ecological Health to be one of several books in which best seller in this year, that's because when you read this publication you can get a lot of benefit in it. You will easily to buy this kind of book in the book retailer or you can order it via online. The publisher on this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smart phone. So there is no reason to your account to past this reserve from your list.

#### **David Jones:**

The particular book New Directions in Conservation Medicine: Applied Cases of Ecological Health will bring someone to the new experience of reading a book. The author style to spell out the idea is very unique. If you try to find new book to learn, this book very suited to you. The book New Directions in Conservation Medicine: Applied Cases of Ecological Health is much recommended to you to learn. You can also get the e-book in the official web site, so you can more easily to read the book.

#### **Carol Hamilton:**

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you never know the inside because don't judge book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer may be New Directions in Conservation Medicine: Applied Cases of Ecological Health why because the great cover that make you consider in regards to the content will not disappoint a person. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.

#### **Brooke Fisher:**

Is it an individual who having spare time subsequently spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This New Directions in Conservation Medicine: Applied Cases of Ecological Health can be the respond to, oh how comes? The new book you know. You are and so out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these books have than the others?
