Introductory Logic: Student (4th edition)

James B. Nance, Douglas J. Wilson

Introductory Logic: Student (4th edition) James B. Nance, Douglas J. Wilson

Logic is the art of reasoning well—of learning to think God's thoughts after Him. In this book, directed toward junior-high students, Douglas Wilson and James Nance lay the proper foundation of reasoning in the truth of God, and go on to train students in the crucial skills of defining terms, recognizing basic types of statements, arguing with syllogisms, arguing in ordinary language, and identifying informal fallacies.

This text, together with *Intermediate Logic* by James Nance, provides students with a rigorous course in logic that will help them excel in every other subject they will study, from math and science to rhetoric and the humanities. Extensively revised and updated, with additional review questions and exercises for each unit, this book is an essential part of every Christian school or home school curriculum.
