Geoffrey Taylor, Lindsay Kleeman

Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) Geoffrey Taylor, Lindsay Kleeman

This book moves toward the realization of domestic robots by presenting an integrated view of computer vision and robotics, covering fundamental topics including optimal sensor design, visual servo-ing, 3D object modelling and recognition, and multi-cue tracking, emphasizing robustness throughout. Covering theory and implementation, experimental results and comprehensive multimedia support including video clips, VRML data, C++ code and lecture slides, this book is a practical reference for roboticists and a valuable teaching resource.

From reader reviews:

Amy Hewitt:

This Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) are generally reliable for you who want to become a successful person, why. The explanation of this Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) can be on the list of great books you must have is usually giving you more than just simple studying food but feed you with information that possibly will shock your before knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions at e-book and printed ones. Beside that this Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) forcing you to have an enormous of experience including rich vocabulary, giving you trial of critical thinking that we realize it useful in your day action. So , let's have it and enjoy reading.

Christine Willis:

Hey guys, do you really wants to finds a new book to study? May be the book with the title Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) suitable to you? The actual book was written by well known writer in this era. The actual book untitled Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics)is one of several books that everyone read now. This particular book was inspired many people in the world. When you read this publication you will enter the new shape that you ever know previous to. The author explained their thought in the simple way, therefore all of people can easily to understand the core of this reserve. This book will give you a lot of information about this world now. To help you see the represented of the world in this particular book.

Harold Esparza:

Typically the book Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) will bring one to the new experience of reading a book. The author style to spell out the idea is very unique. If you try to find new book to learn, this book very acceptable to you. The book Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) is much recommended to you to see. You can also get the e-book from your official web site, so you can more easily to read the book.

Ian Sharpless:

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was

given by teacher for their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person just like reading or as reading become their hobby. You need to understand that reading is very important along with book as to be the thing. Book is important thing to add you knowledge, except your teacher or lecturer. You will find good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them is this Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics).
