## **Depth: An Account of Scientific Explanation** Michael Strevens

What does it mean for scientists to truly understand, rather than to merely describe, how the world works? Michael Strevens proposes a novel theory of scientific explanation and understanding that overhauls and augments the familiar causal approach to explanation. What is replaced is the test for explanatorily relevant causal information: Strevens discards the usual criterion of counterfactual dependence in favor of a criterion that turns on a process of progressive abstraction away from a fully detailed, physical causal story. The augmentations include the introduction of a new, non-causal explanatory relevance relation?entanglement?and an independent theory of the role of black-boxing and functional specification in explanation.

The abstraction-centered notion of difference-making leads to a rich causal treatment of many aspects of explanation that have been either ignored or handled inadequately by earlier causal approaches, including the explanation of laws and other regularities, with particular attention to the explanation of physically contingent high-level laws, idealization in explanation, and probabilistic explanation in deterministic systems, as in statistical physics, evolutionary biology, and medicine.

The result is an account of explanation that has especially significant consequences for the higher-level sciences: biology, psychology, economics, and other social sciences.

### From reader reviews:

#### **Mike Munguia:**

The book *Depth: An Account of Scientific Explanation* can give more knowledge and information about everything you want. Why then must we leave a good thing like a book *Depth: An Account of Scientific Explanation*? Wide variety you have a different opinion about book. But one aim this book can give many data for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or data that you take for that, it is possible to give for each other; you may share all of these. Book *Depth: An Account of Scientific Explanation* has simple shape but you know: it has great and big function for you. You can search the enormous world by available and read a e-book. So it is very wonderful.

#### **Karl Harms:**

Spent a free time and energy to be fun activity to try and do! A lot of people spent their free time with their family, or their particular friends. Usually they accomplishing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled *Depth: An Account of Scientific Explanation* can be good book to read. May be it might be best activity to you.

#### **Kevin Shepherd:**

In this age globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The actual book that recommended to you is *Depth: An Account of Scientific Explanation* this book consist a lot of the information in the condition of this world now. This specific book was represented how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book suitable all of you.

#### **Colin Wegner:**

As we know that book is important thing to add our know-how for everything. By a guide we can know everything you want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This publication *Depth: An Account of Scientific Explanation* was filled in relation to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has different feel when they reading a book. If you know how big good thing about a book, you can experience enjoy to read a book. In the modern era like right now, many ways to get book which you wanted.
