Most of the people I know chose to be gluten free as a way to lose weight and experienced great results. Not every single one, but most did. The part that impresses me is that they had fewer digestive issues, bloating was almost non-existent and even their skin cleared up. Not one ever suspected that gluten could be the cause.

Not surprisingly, most of them started on their journey following the Wheat Belly Diet or a similar type program that promoted wheat as something your body doesn't need. If you want to achieve a healthier balanced diet, then a gluten free one may be the way to go.

If you love this cookbook, don't miss out on the others in the series.
