## **Matter to Mind to Consciousness: Anatomy of the E.L.F.** T. Lee Baumann

In *Matter to Mind to Consciousness*, Lee Baumann, M.D. transforms how you have always viewed conscious thought. Through his continued pursuit of science - now to the level of the human brain - Baumann demonstrates both our mind's contributions and vulnerability to the electromagnetic medium surrounding us. Most nerve cells in the outermost layers of the brain end blindly, without any continuing nerve connections. Baumann investigates the possibilities underlying this peculiar medical observation and suggests that these neurons are the very beacons of our human awareness and consciousness. Join the author on a journey into the mystical realm of electromagnetism and the proven phenomena which allow our infinitesimally weak brainwaves to radiate into space and circle the globe several times over. For the first time, an explanation exists, not only for paranormal phenomena, but also for our own human awareness and thought. Again, Dr. Baumann proves that reality IS stranger than fiction.
